***Response to Amendment***

This is in response to an amendment file on February 10<sup>th</sup>, 2004. In the amendment, no claim has been amended, no claim has been canceled, and claims 58-175 have been added.

Claims 23-175 are pending in the letter.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 23-57, drawn to software adaptation, classified in class 705, subclass 58.
  - II. Claims 58-175, drawn to digital information instance, classified in class 714, subclass 3.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because they are patentably distinct. The subcombination has separate utility such as software adaptation and digital information instance.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3621

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
